

What is the best plan we recommend to secure high profitability?

Parking business can be short term business

Everybody expects that parking business will be for a long term base freezing fund for a long term.

In Japan land rental for a short time is possible since rental law has been revised. Nowadays, parking business is carried out for a short term base. If the investment can be recovered in such a short term, for example, a land waiting for another investment project can be utilized. Of course whether this is possible in your country or not depends on the legal structure in your country. We have to decide the best way thinking about all situations flexibly.

Our Round Automated System is Removable, Easy demolition, Movable property (Liquidity of real estate)

Even after completing the installation, it is possible to move to the location to be able to expect the high profit.

As nuts and bolts of this entire system/machine (including electric components and sensors) is only the robot installed in the center of the round shape, it means very simple structure and it calls "steel module". In addition, it causes less trouble and keeps the maintenance cost low.
